Comments:

Part E4: Trauma Registry codes are used to determine Trauma volumes in the ED. ICD-10 codes are utilized to determine psych ED volumes. Patients ages 0-17 are considered pediatric patients treated in pediatric beds. All other patients are considered treated in general ED beds for survey reporting. Utilization volumes are based on the type of clinical encounter, regardless of where within the ED the encounters take place.

- Part E.8: Hospital unable to track diverted cases.

- Part F.1.b: Hospice counts show hospice patients admitted to the hospital, not volumes connected with Wellstar-owned hospice facilities.

- Perinatal Services Addendum Parts C.1, C.2: Mothers' admissions and corresponding inpatient days do not include antepartum admissions and days.

- Minority Health Addendum: Interpreters are shared across the Wellstar Health System.

- Parts G.3 and G.4: The differences in the total number of physicians between these two categories are attributable to the physicians accounted for in G.4 who do not have admitting privileges; consistent with the survey instructions those non-admitting physicians are not counted in G.3. The reported number of physician providers enrolled in Medicaid/ PeachCare and/or public employee health benefits plan was derived from WMG and business partners who are identified to be enrolled in Medicaid and Blue Cross Blue Shield for PEHB. The hospital expects that there are additional physicians on its medical staff who are enrolled in these programs but not reflected in the survey count.
