Momentum is an amazing thing, built over time by the constant movement of activities, events and initiatives to create something extraordinary. In healthcare, sustaining momentum can be a powerful force for growing vibrant, healthy communities. At WellStar Health System, our momentum is sustained by the compassionate care delivered by the more than 20,000 team members at our 11 hospitals, more than 250 medical office locations, and our multiple outpatient facilities. And in 2017, our impact in the communities we serve was truly extraordinary.

The highlights listed to the left are only a small sample of the tremendous results achieved through the hard work and dedication of WellStar’s team members over the past year as we strive to exceed the expectations of our patients and consumers. Through our multiple accreditations, program initiations or starts, and new openings, we continue to shape and define the future of healthcare. As a mission-driven, not-for-profit System, 100 percent of our revenue is reinvested into the care we provide to ensure we address the healthcare needs of the communities we serve and make a difference in people’s lives. In this report, you’ll meet some of the people WellStar had the privilege of helping, including a 72-year-old athlete who won gold after prostate cancer treatment, a teenager traveling through Atlanta involved in a deadly bus accident, and a young mother who at only 33 weeks of pregnancy required emergency heart surgery.

While this book serves as a look at the past year, we are constantly looking to the future. Our integrated network of physicians and caregivers continues to grow, allowing us to meet patient needs across the entire spectrum of healthcare. To keep our momentum going and ensure we remain the leading provider of healthcare services for generations to come, we remain focused on the delivery of high-quality care. Additionally, we are committed to innovation in the form of new technologies, treatments, and processes for addressing today’s – and tomorrow’s – healthcare challenges. And just as important, we are cultivating the next generation of physicians and health professionals to care for you and your family.

Thank you for allowing WellStar to be a part of your life and community, and on behalf of the entire WellStar family, we wish you blessings of good health.

Candice L. Saunders
President & CEO

David H. Hafner, M.D.
Chair, Board of Trustees
Our momentum is shaping the future of healthcare delivery.

High-quality healthcare begins with the availability of excellent care providers, and our network of highly-trained physicians, advanced practice professionals and nurses are expanding across Georgia. With the addition of our innovative Health Parks, we are delivering more outpatient care where people live, offering a variety of services under one roof for increased convenience. Patients and consumers can receive the most advanced treatments, techniques and services close to home through our collaboration with the Mayo Clinic Care Network, where physicians and patients have access to Mayo Clinic experts on complex diagnoses and treatment plans at no added cost to the patient. In all, our efforts are focused on improving community access to the finest healthcare.

Healthcare is changing rapidly, and WellStar is leading the way. Today, we have the most powerful weapons to fight disease in the history of medicine, and these tools in the hands of skilled clinicians are leading to amazing outcomes. At WellStar, our focus is on patients. To achieve world-class healthcare, our physicians have more information at their fingertips than ever before. As healthcare providers become better connected, so are patients, and WellStar has made extraordinary progress in exceeding their expectations. By treating people, not just illnesses, our providers are creating healthier communities. That’s momentum.

Building a better network

Our strategically designed care model is meeting patient needs across the spectrum.
An essential part of our mission is to improve the health of vulnerable populations, regardless of their ability to pay. Roughly 10 percent of our patients have no insurance, but we are committed to providing the highest standard of care for all. We are advancing population health initiatives to care for people outside our hospital walls, including those with chronic conditions that must be managed. We have built an Accountable Care Organization (ACO) to address the full spectrum of priority health needs, from prevention and wellness programs to inpatient and outpatient care, and we are transferring what we have learned in this process throughout our System. Each day, we are directing our resources where the need is greatest.

In the community
WellStar is a not-for-profit health system and we are continually reinvesting our resources to improve the health of the communities we serve.

Increasing the number of physicians practicing in our communities requires training programs, and WellStar has Graduate Medical Education programs at two hospitals. We work collaboratively with nursing schools and have developed a nursing residency program to help new nurses feel confident at the bedside. By offering a wide variety of opportunities for nurses to build their careers, we are able to give them options to grow within the WellStar family. WellStar is committed to caring for all team members – including support for their work-life balance – because together we can improve the care we deliver to our patients and communities.

Cultivating the next generation
To grow the right team and address the national shortage of physicians and nurses, we are creating programs to recruit, train and retain the best.
WellStar clinicians are on the leading edge of innovation and our physicians are delivering state-of-the-art care. For example, we are one of only two locations in the country offering two state-of-the-art radiation treatments, CyberKnife and TomoTherapy, for complex cancers. For patients with breast and lung cancers, we have launched STAT Clinics at three of our hospitals. These clinics enable patients to see all the specialists they need at one location and the physicians work together on each case, which speeds diagnosis and treatment. Through these and other innovations, we are fulfilling the need for effective and efficient healthcare.

In our journey to become a high-reliability organization, WellStar physicians and clinicians are working together to solve problems and deliver high-quality healthcare. Care teams also are sharing best practices, allowing providers across the System to improve safety and long-term outcomes. We are implementing evidence-based care plans for chronic diseases as well as other process improvement programs. A great example is our cardiac checklist for congestive heart failure patients, which has shown remarkable results, more effective treatments and a speedier return home. To achieve our goal of high reliability, we are examining all facets of our people, processes and technology for improvement.

Innovating for the future

Our constant drive for innovation is delivering the latest technology and treatments to positively impact our patients and communities.

Focusing on quality

We are improving quality and safety by focusing on people, processes and technology.
"It’s rare to feel like the hospital staff is part of your family, but the nurses who cared for Walter in the NICU cared for him as if he were their own.”

– Rachel Rennie, patient

Mother stays close to baby in NICU for breast feeding and bonding.

When Rachel Rennie received a diagnosis of preeclampsia, a potentially life-threatening condition involving high blood pressure, her labor was induced at 36 weeks and four days. During this stressful time, her WellStar obstetrician and team of nurses helped keep her calm. Their support and compassion continued after her son, Walter, was born and taken to the Neonatal Intensive Care Unit (NICU), where he spent 18 days. While seeing Walter covered in wires was tough on Rachel and her husband, the NICU staff were encouraging and Rachel was able to room-in near Walter so she could breastfeed and bond with her new son.
Collaboration between two WellStar hospitals resulted in a teenager’s quick recovery from serious bus accident.

Sixteen-year-old Meleah Herfurth and members of her Alabama-based church were headed to the Atlanta airport for a mission trip flight when the bus flipped over several times. Meleah was taken to WellStar Atlanta Medical Center’s Level I Trauma Center where she was diagnosed with road burns and embedded glass in 10-15 percent of her body, a broken rib and wrist, lung puncture and liver laceration. Her burns required specialized treatment, and since she could not be moved, burn specialists from WellStar Cobb Hospital’s Burn Center travelled to WellStar Atlanta Medical Center and teamed up with physicians and caregivers for a seamless experience, allowing Meleah to return home and back to school.

“God obviously had his hand on her and had the right people taking care of her.”

– Cathy Herfurth, Meleah’s mom
“There's so much life that I still need to live. I'm not allowing breast cancer to stop me.”

— Belinda Momon, patient

Regular self-examination and the latest imaging technology help fight breast cancer.

For 57-year-old Belinda Momon, regular breast self-exams and yearly mammograms were the norm because she'd lost her mother to breast cancer. But last year, a month after receiving a clear mammogram, she found a lump. She wasted no time seeing WellStar physicians who confirmed the cancer and performed a mastectomy followed by chemotherapy and radiation. With the support of her school, church and family, the choir-singing music teacher soon returned to school and to the church choir. She has many plans to live life to the fullest from now on.
Fast thinking and expertise save the lives of a mother and her unborn daughter.

While cooking dinner one evening, 37-year-old Olivia Farr collapsed in agonizing pain. The mother of two teenage girls was 33 weeks pregnant with her third child and suffered an aortic dissection, a tear in the large blood vessel leading from the heart. Within minutes, Olivia was in the cardiovascular operating room where WellStar physicians delivered her daughter via cesarean section and repaired her aorta. Now, one year later, Olivia and her daughter, Laken, are enjoying every precious moment thanks to the efficiency and precision of their WellStar medical teams.

“I had a 5 percent chance to get to the hospital and make it through this operation.”

– Olivia Farr, patient
Athlete beats prostate cancer, wins gold medal in shot-put competition.

Four years after robotic surgery removed his prostate gland, 72-year-old Tom Russell’s cancer returned despite his athletic lifestyle. Battling cancer for a second time, his WellStar radiation oncologist recommended an advanced treatment called TomoTherapy, which delivers targeted radiation without affecting other parts of the body. Not only is the treatment extremely effective, it allows patients to continue their activities while undergoing treatment, meaning Tom didn’t have to curtail his daily workouts. Midway through his treatment, Tom won a gold medal for shot-put, defeating the cancer and his competition.

“The better shape you’re in, the easier you can overcome obstacles along the way.”

– Tom Russell, patient
The WellStar Health System footprint has grown to provide more Georgians with world-class healthcare in the most cost-effective settings, close to their homes. Throughout Metro Atlanta and in counties to the south, we strive every day to improve access to healthcare services that will make these communities healthier while offering value and controlling costs. As our reach has grown, so has our depth in the form of best practices shared throughout our System. A patient who encounters WellStar at any location has the leading-edge resources of our entire System at hand in the prevention and treatment of diseases. Across all of our care sites, patients have the full strength of WellStar’s network behind them.
Our healthcare, by the numbers.

3,288 member medical staff

1,700 physicians in WellStar Clinical Partners

50,000 members in WellStar’s Accountable Care Organization, the largest in Georgia

680,000 Emergency patients every year
Caring for all.

At WellStar, we are committed to caring for those in need throughout our community. For the past eight years, we have provided more than $250 million per year in unreimbursed care. This year, the amount increased dramatically due to our 2016 expansion. More than 10 percent of all healthcare provided by WellStar was for those without insurance.

As the graph below illustrates, WellStar incurred costs of almost $252 million to provide charity care to patients in Bartow, Butts, Cherokee, Cobb, Douglas, Fulton, Paulding, Spalding and Troup counties in Fiscal 2017. Patients, who meet the criteria, are deemed eligible for charity care, with no obligation to pay, according to state regulations and WellStar policy.

We also provided an additional $117 million to care for those who, for various reasons, did not apply for charity care, but were unable to pay for services. Finally, our physicians and facilities made up a significant shortfall in reimbursements for patients on Medicaid ($78 million) and on Medicare ($190 million).

*Excluding the net operating costs of pre-acquisition activities.

WellStar invested $136 million from purchases of PPE on cash flow in facilities, equipment and information systems technology in FY 2017. In our five-year capital plan, we will re-invest $1 billion.

For reporting purposes, WellStar follows federally mandated and other guidelines for patients, including:

**Indigent:** Patients at or below 125 percent of the federal poverty level.

**Charity:** Patients between 125 and 300 percent of the federal poverty level.

**Medicaid:** A federal- and state-administered program providing access to care for certain low-income and/or disabled individuals. On average, Medicaid reimburses physicians, hospitals and other providers less than the cost of care.

For 2017, the U.S. Census Bureau defined the federal poverty level as $12,060 for an individual and $24,600 for a family of four.

*Source: Bureau of Labor Statistics (January 2017 data)*
High-quality healthcare begins with our incredible people.

“Our pharmacists play an important role in the community by ensuring the safety of our patients and aiding in their recovery.”
– Snehal Doshi, VP, Pharmacy

“When a new mom comes to us, I love bonding with her and sharing my expertise.”
– Susan Owens, RN, Labor & Delivery

“Technology is a tool that helps our caregivers deliver world-class healthcare.”
– Steve Brown, Director of IT

“We all make a difference in the lives of our patients.”
– Roxy Martinez, Environmental Services

The numerous awards and recognitions WellStar has received are due to the dedication and hard work of our 20,000 team members. We recognize that we are fortunate to have outstanding physicians, nurses and team members, and we continually attract, train and retain the best. Our focus remains on building trust and engagement among our team as we improve the care we deliver. Higher levels of employee engagement result in lower turnover, lower absenteeism, increased safety and better outcomes for our patients. We have spent the better part of ten years implementing initiatives to boost team member and physician engagement. We have created a
number of team-member-oriented services, such as on-site day care and a concierge service to help with routine errands as well as unexpected challenges. Through numerous programs, we are committed to reducing distractions and helping our team members create a balance between their work lives and their personal lives. This ultimately leads to a more focused team and better patient care.

Finally, we make career advancement a priority, offering education and training as well as leadership development programs. We fill more than 92 percent of our open positions with internal candidates. By building a team and cultivating growth, we have some of the most skilled clinicians and team members in the Southeast.

We are extremely proud of the incredible people who represent WellStar every day. Together, we are boosting the level of care available to our patients and improving the health of our community.
Board of Trustees

As a not-for-profit health system, WellStar is grateful to the physicians and community leaders who voluntarily serve on our WellStar Board of Trustees. They give countless hours of strategic direction and organizational support to advance our mission.

**LEFT TO RIGHT:**

---

We bring care outside our walls, and into our communities.

Improving the health of vulnerable populations, including those with financial need, is an essential part of WellStar’s mission and our momentum in building a healthier community continues to grow. Our outreach efforts are led by the WellStar Community Health Collaborative, comprised of WellStar team members and community stakeholders. The goal is to ensure one equitable standard of care – the highest – for all by removing barriers to care and ultimately improving community health. Some ways our preventive, outcomes-focused community services touch those in need are through hospital care regardless of ability to pay, mammogram vouchers for low-income women, chronic disease management, cancer screenings, health promotion education and free or reduced lab and radiology services to partnering safety net clinics. Below are additional ways we strengthened our communities in 2017.

- 338,872 people had access to health information from WellStar
- 4,112 total events
- 16,873 individual health screenings and flu shots
- 2,813 Good Life Club Members
- 2,700 car seat inspections
- 13 different classes offered at 105 schools throughout Metro Atlanta to educate and promote healthy habits in children
- 960 car seats
- 120 bicycle helmets
- 35 life jackets
Creating a positive impact through the generosity of our community.

When a patient needs care, WellStar is there, no matter someone’s ability to pay or how severe the situation. Through generous contributions from individuals, local businesses and organizations, the WellStar Foundation provides the community with peace of mind by ensuring world-class healthcare is close to home. That’s the power of philanthropy.

From raising more than $800,000 to support WellStar’s leading trauma network, to purchasing innovative, medical equipment used for in WellStar’s Cath Labs, to providing free cancer screenings in the community, the WellStar Foundation is making a significant positive impact on the lives of patients and families. Every dollar raised goes directly toward meaningful initiatives that improve and save lives.

In FY17, the WellStar Foundation raised more than $4.6 million to advance healthcare services across the System. These funds were received through individuals in our community, estate gifts, honor/memorial gifts, grant funding and corporate sponsorships of our three major fundraising events: WellStar Starlight Grand Gala, WellStar Golf Classic and WellStar Clay Shoot. Additionally, WellStar’s own team members contributed nearly $1 million to enhance healthcare services in the communities in which they live and serve.

Many Foundation donors are former patients or family members of patients, like Chris Poston. Chris was previously a member of the WellStar Foundation Board of Trustees and is currently on the WellStar Kennestone Hospital Board Authority. Through his volunteer work, Chris came to know the breadth of WellStar’s services for patients and communities.

However, it wasn’t until his mother was diagnosed with breast cancer that the true nature of WellStar’s care hit home. Three years ago, a team of oncology nurses cared for Vicki Poston with incredible compassion. They and provided comfort and reassurance to her family during the difficult time from her diagnosis to her passing nine months later. One of the nurses even visited the family after Vicki passed away.

To show his gratitude for these nurses, Chris and his family funded a scholarship for oncology nurses in his mother’s name. The Vicki Poston Oncology Nursing Scholarship enables nurses to continue their education and further enhance the quality of care they deliver. Chris says this tribute to his mother will help keep her memory alive.

“We felt how much the team cared and that helped ease our pain. I donated in honor of my mom and what the oncology nurses did for her.”

– Chris Poston, donor and Marietta business owner

WellStar Foundation
FY17 Impact of Giving

100% of the donations received go directly toward Foundation initiatives that strive for a healthier community.

$4.6 million in total funds raised in Fiscal Year 2017

8,639 donors

870 volunteers

163,332 hours

700 free mammograms provided to medically underserved and uninsured

28 team members and their families received support from the Emergency Assistance Fund after an unforeseen catastrophic event

58 scholarships provided $63,500 to Team Members or dependents pursuing degrees in healthcare related fields

$107,000 for an anesthesia machine to improve safety and patient care during procedures at WellStar Kennestone Cath Lab

$178,695 in proceeds raised by the WellStar Golf Classic

$105,768 in proceeds raised by the WellStar Clay Shoot

$820,445 in proceeds raised by the WellStar Starlight Grand Slam Gala

$23,000 pledged by WellStar North Fulton Hospital team members to build an interfaith hospital chapel

$12,500 for the Dispensary of Hope program to provide low income and uninsured households with free prescription medications

$105,768 pledged by WellStar North Fulton Hospital team members to build an interfaith hospital chapel

The WellStar Foundation purchased a Demo Kitchen located in WellStar Health Place, and upgraded exercise equipment within cardiac rehabilitation
Lifetime Donors

WellStar Foundation is grateful to the following generous donors whose cumulative lifetime gifts of $100,000 or more have made a significant impact on the healthcare of those around us. Because of their support of WellStar Health System’s efforts to provide total family world-class care close to home, WellStar can continue to improve access to care and find innovative ways to meet the healthcare needs of the communities we serve.

Helping us do more

The WellStar Foundation partners with generous individuals, corporations and organizations to ensure WellStar Health System has the resources necessary to bring world-class care to our community. WellStar Foundation is deeply grateful to the many donors who have supported WellStar with gifts of $1,000 or more during this past fiscal year from July 1, 2016 – June 30, 2017:

Mr. and Mrs. Allen Franklin*
Maybe you’ve been a patient at a WellStar facility and received world-class healthcare. Or perhaps we’ve treated a family member and you appreciate the compassion you encountered. Possibly you’re someone who wants to ensure you and your neighbors continue to have access to the extraordinary services we deliver.

In any case, you can positively affect the lives of those in your community by becoming a donor to the WellStar Foundation and continue the WellStar momentum for generations to come.

Our World-Class Caregiver Program is one way to make a meaningful gift recognizing doctors, nurses, housekeepers, volunteers and others who have made a difference to patients, families and their communities. Gifts of any amount to this program help make an immediate impact.

By joining our Planned Giving Program, you can give back to the community later. Talk with your financial planner and our staff specialist to choose the option that’s right for you. If you’d like to make a major, transformative gift to WellStar Health System or to a specific project, consider our Strategic Giving program.

At whatever level you choose, your donations are tax deductible and 100 percent of the funds go to WellStar Foundation initiatives.

Thank you for improving your community’s health and continuing the momentum of WellStar Health System.
